

American Red Cross

To: Chapters, Service Areas **Date:** October 6, 2005
From: Kevin Kelley
Director, Planning and Guidance
Preparedness and Response **Subject:** Revised *Disaster Operation Guidance*
#1 B, *Individual Assistance for*
Hurricanes Katrina and Rita

Dear Colleagues,

We continue to refine the individual assistance zip codes in the affected areas based on recent disaster assessments. Based on our most recent assessments, we have updated the list of zip codes of clients' pre-hurricane residences to be used for individual assistance. Included in this update are four additional Louisiana parishes with shaded zip codes indicating "limited damage" as well as a number of parishes changed to the limited damage designation. In addition, there are three zip codes in the Louisiana county of Iberia that have also been changed to shaded to indicate limited damage. We have also added two new shaded zip codes in Hardin County, Texas. Our last update moved Alabama zip codes to the limited damage designation indicating areas that require follow up verification.

Red Cross assistance to families is intended to provide for their most immediate needs caused by direct damage to their homes. Clients must have a pre-disaster address in the affected zip code list or have damage verified through the chapter's damage assessment information. The most specific information available should be used to verify the client's address. With a verified address, assistance is given on stated needs.

Clients with addresses in the zip codes identified as having limited damage and clients whose pre-disaster address is not in the affected zip code lists or chapter damage assessment will be handled on a case-by-case basis. Verification of damage must be obtained prior to issuing assistance. Chapters outside the affected area should contact the Chapter Client Casework Support Center at 1-800-958-2351 or e-mail casework@usa.redcross.org for assistance. Chapters in Alabama, Mississippi, Louisiana and Texas should coordinate with the relief operation in their state.

The bottom line remains that if clients have direct disaster-caused needs, the Red Cross will assist them. If the client's only loss was food spoilage due to power failure, the Red Cross can help meet the need for food by ensuring the client has information about feeding sites and local agencies that help with food. **Clients who had only power outage as a result of the disaster will not receive assistance to replace lost food.** Also, clients who had evacuation costs but did not suffer damage to their homes are not eligible for assistance. Red Cross workers should provide information for clients regarding other community resources or ask clients to call 1-866-GET INFO.

We recognize that chapters beyond the disaster-affected area will need to use the zip code list as the best available disaster assessment and we will continue to update these lists based on additional assessments made by the relief operations.

INDIVIDUAL ASSISTANCE FOR HURRICANES KATRINA AND RITA***REVISED TO INCLUDE UPDATED CLIENT INDIVIDUAL ASSISTANCE
ZIP CODE LIST AS OF 10/06/05*****Individual Assistance for Hurricanes Katrina and Rita**

The individual assistance program originally established for people affected by Hurricane Katrina will now be expanded to include people affected by Hurricane Rita. The Red Cross will provide the same assistance to Hurricane Rita clients as to Hurricane Katrina clients; the Red Cross provides assistance based on disaster-caused needs related to property damage.

PLEASE NOTE: There are now two separate and different zip code listings – one for individual assistance and another for special transient accommodations. The zip code list included in this document is developed for individual assistance (Attachment B, Client Individual Assistance Zip Codes) and is based on recent damage assessments performed by the disaster relief operations. This list of zip codes of clients' pre-Hurricane Katrina and Rita residences has been updated in this guidance.

INDIVIDUAL ASSISTANCE – food and other assistance

The intent of assistance is to help Hurricane Katrina and Hurricane Rita disaster clients wherever they are and to ensure the provision of equitable assistance. Any given client can only be assisted by the Red Cross once. Red Cross assistance is a bridge to federal and state assistance. Individuals applying to FEMA for assistance should have already begun to receive, or will be very shortly receiving financial assistance.

Supporting Assistance

Red Cross assistance to families is to provide for their most immediate needs caused by direct damage to their homes. Assistance can be provided to clients with pre-disaster addresses in the affected zip code list based on the client-stated need.

We continue to refine the zip code lists based on disaster assessment and have now identified zip codes in areas where damage is limited. We have SHADED these zip code rows in Attachment B indicating "areas with limited damage which require follow up verification by the disaster relief operation." Clients whose pre-disaster residence address appears in the zip code listing in a SHADED row may be eligible for Red Cross assistance but, prior to the issuance of assistance, the disaster relief operation will provide verification of damage.

Clients with addresses in the zip codes identified as having limited damage and clients whose pre-disaster address is not in the affected zip code lists or chapter damage assessment will be handled on a case-by-case basis. Verification of damage must be obtained prior to issuing assistance. Chapters outside the affected area should contact the Chapter Client Casework Support Center at 1-800-958-2351 or e-mail casework@usa.redcross.org for assistance. Chapters in Alabama, Mississippi, Louisiana and Texas should coordinate with the relief operation in their state.

If the client’s only loss was food spoilage due to power failure, the Red Cross can help meet the need for food by ensuring they have information about feeding sites and local agencies that help with food. **Clients who had only power outage as a result of the disaster will not receive assistance to replace lost food.** Red Cross workers should provide information for clients regarding other community resources or ask clients to call 1-866-GET INFO.

For clients who meet the eligibility criteria discussed above, items of individual assistance normally contained on the Price List have been consolidated into a lump-sum of assistance based on family size.

Family size	Assistance
One	360
Two	665
Three	965
Four	1265
Five	1565

The amounts listed as ‘Assistance’ are financial caps for each size family. Families of six or more are subject to the \$1565 cap. Demographics indicate the average household unit in the affected areas is 2.6 persons.

If your chapter resources are not sufficient to provide this assistance, you may need to request a cash advance from national headquarters according to the standard protocols.

Chapter Reimbursement

Please refer to *Disaster Operations Guidance #12, Procedures for Vendor Payment and Reimbursement Request for Disaster Relief Expenditures Incurred by Chapters* -

ATTACHMENT B
Client Individual Assistance Zip Codes
Revised 10/06/05

KEY to Damage by Zip Code:

- Unshaded row indicates eligibility for stated-need damage.
- Shaded row indicates areas with limited damage which require follow up verification by the disaster relief operation.
